

CONSTRUCTION IMPACTS

Andres Pico Road & Ysidora Street

Santa Margarita Water District will begin upgrading buried pipelines and pressure zone infrastructure throughout San Juan Capistrano over the next several months. The \$1.7 million investment will improve water system reliability.

The Don Juan Project will focus on Andres Pico Road and Ysidora Street beginning on March 27 and last roughly two months. Construction crews will work Monday through Friday from 7 AM to 5 PM.

In late May, you may receive a door hanger notifying you that your water will be temporarily shut off so crews may run tests on the system.

Santa Margarita Water District is investing \$20 million in San Juan Capistrano over the next decade. Since becoming your water provider in November 2021, SMWD has already invested \$7 million.

We appreciate your patience while crews work safely and efficiently to make these improvements. Please contact us at (949) 459-6420 or CustomerCare@smwd.com with any questions or concerns.
